Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 April 2008.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 7-12, 14 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Buchanan et al-6,074,418.

As to claims 7-12 and 16, Buchanan-'418 (Figs. 2-3, for example) discloses every limitations as recited in the claims such as prosthesis 12 or 14, connector and spiral fastener assembly 40, drive member 44&46 (please, refer to reproduced Fig. 2-3 on next page).

As claim 14, Buchanan-'418 (col. 9, lines 51-61) discloses prosthesis or outer ring 14 is made of Nitinol, a well known super elastic material which will self expand when a heat source, such as a body temperature is provided.

Art Unit: 3773

3. Claim 14 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Buchanan et al-6,074,418.

Buchanan-418 (col. 9, lines 51-61) discloses prosthesis/outer ring 14 is made of Nitinol, a well known super elastic material which will self expand when a heat source, such as a body temperature is provided.

Alternatively, it would have been obvious to one of ordinary skill in the art to provide a thermally expandable nitinol by a body temperature so that prosthesis/outer ring 14 can self expand to engage a local tissue.

4. Claim 15 is rejected under 35 U.S.C. 103(a) as obvious over Buchanan et al-6,074,418.

Buchanan-418 (col. 9, lines 51-61) discloses prosthesis/outer ring 14 is made of a polymeric material, which is not self-expandable to a configuration to contact the tissue. It is well known in the art to use a balloon to expand a prosthesis to a configuration to contact a tissue. It would have been obvious to one of ordinary skill in the art to provide a balloon to expand the prosthesis/ring 14 made of a polymeric material so that the prosthesis/ring 14 can expand to contact a local tissue.

Claim Objections

Claims 14-15 are objected to because of the following informalities: claims 14-15 are improperly dependent to a canceled claim 1. Appropriate correction is required.

Conclusion

This is a RCE of applicant's earlier Application No. 09/935,893. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
